CAREER SUMMARY

As a graduate with a degree in Information Technology, my goal is to serve the country by applying my technical skills, discipline, and commitment to excellence as a member of the Philippine Army. I aim to contribute to military operations through information systems, data management, and administrative support while continuously developing my leadership and service-oriented capabilities. My IT background aligns with the Army's need for personnel who can adapt to modern technology and support mission-critical operations with efficiency and integrity.

EXPERTISE

- Information Technology Skills** – Knowledgeable in computer systems, software applications, troubleshooting, and basic network management.
- Technical Support & Problem Solving** – Experienced in diagnosing technical issues, maintaining systems, and providing effective solutions.
- Data Management** – Skilled in data entry, database handling, record organization, and maintaining accurate information. Technical Skills.
- Communication & Teamwork** – Able to collaborate with teams, follow instructions, and communicate effectively in professional environments.
- Adaptability & Discipline** – Capable of learning new technologies, working under pressure, and maintaining focus in challenging situations.
- Leadership & Service Mindset** – Committed to continuous improvement, integrity, and contributing to organizational goals.
