Multimedia Technology

LEARNING UNIT 1

INTRODUCTION TO MULTIMEDIA

LEARNING OUTCOMES

- Define what multimedia is.
- Identify five multimedia components.
- Explain why multimedia is so powerful to increase human-computer interaction.
- Examine multimedia applications in several areas.

“Multimedia is a polysemous term, a term with **many definitions**, and in this case, many roots. ... **multimedia is defined as the seamless integration of two or more media.**”

- *Heller, Martin, Haneef and Gievska-Krliu (2001)*

Multi

- many, multiply, not single

Media

- any medium that the human being can perceive comprehend.

Multimedia

Multimedia is concerned with the **computer-controlled** integration of text, graphics, drawings, still and moving images, animation, audio, and any other media.

“multimedia as human-computer interactive process that involved digital elements of text, graphics, audio, video and animation.”

Summary

Multimedia is defined as **human-computer interactive process** that involve digital elements of text, graphics, audio, video and animation.

The development of multimedia technology has **changed** the way we work and play.

Interactive multimedia has several **capabilities** such as having intuitive interface and better acceptance of learning content.

Multimedia applications can be found extensively in **education, business, entertainment** and **medical field**.
