

exam 1

Exam Paper

fdfdfd

1. According to the lesson, what is described in statement 1?

- A. A Device for Integrated Traffic Violation Apprehension
- B. and Payment System Using NFC Technology
- C. , Patrick M.
- D. Computer Engineering Department, Adamson University, Philippines

2. According to the lesson, what is described in statement 2?

- A. and Payment System Using NFC Technology
- B. , Patrick M.
- C. Computer Engineering Department, Adamson University, Philippines
- D. Abstract--This research project presents the solution on

3. According to the lesson, what is described in statement 3?

- A. , Patrick M.
- B. Computer Engineering Department, Adamson University, Philippines
- C. Abstract--This research project presents the solution on
- D. how to eliminate the long process of issuing traffic

4. According to the lesson, what is described in statement 4?

- A. Computer Engineering Department, Adamson University, Philippines
- B. Abstract--This research project presents the solution on
- C. how to eliminate the long process of issuing traffic
- D. violations to the caught drivers; the repossession and

5. According to the lesson, what is described in statement 5?

- A. Abstract--This research project presents the solution on
- B. how to eliminate the long process of issuing traffic
- C. violations to the caught drivers; the repossession and
- D. confiscation of Driver's License will be done virtually.

6. According to the lesson, what is described in statement 6?

- A. how to eliminate the long process of issuing traffic
- B. violations to the caught drivers; the repossession and
- C. confiscation of Driver's License will be done virtually.
- D. present project includes a device that used by the traffic

7. According to the lesson, what is described in statement 7?

- A. violations to the caught drivers; the repossession and
- B. confiscation of Driver's License will be done virtually.
- C. present project includes a device that used by the traffic
- D. enforcers to issue traffic violations to drivers that provides a

8. According to the lesson, what is described in statement 8?

- A. confiscation of Driver's License will be done virtually.
- B. present project includes a device that used by the traffic
- C. enforcers to issue traffic violations to drivers that provides a
- D. real time notification, payment and traffic violation record

9. According to the lesson, what is described in statement 9?

- A. present project includes a device that used by the traffic
- B. enforcers to issue traffic violations to drivers that provides a
- C. real time notification, payment and traffic violation record
- D. system and method for vehicle traffic violations, a system

10. According to the lesson, what is described in statement 10?

- A. enforcers to issue traffic violations to drivers that provides a
- B. real time notification, payment and traffic violation record
- C. system and method for vehicle traffic violations, a system
- D. that facilitate the registration of accounts and monitoring of

11. According to the lesson, what is described in statement 11?

- A. real time notification, payment and traffic violation record
- B. system and method for vehicle traffic violations, a system
- C. that facilitate the registration of accounts and monitoring of
- D. all the transactions made, a Smart Driver's License Card,

12. According to the lesson, what is described in statement 12?

- A. system and method for vehicle traffic violations, a system
- B. A different answer about According to the lesson, what
- C. A related but incorrect answer
- D. An answer not supported by the lesson

13. According to the lesson, what is described in statement 13?

- A. True
- B. False
- C. A different answer about According to the lesson, what
- D. A related but incorrect answer

14. According to the lesson, what is described in statement 14?

- A. all the transactions made, a Smart Driver's License Card,
- B. A different answer about According to the lesson, what
- C. A related but incorrect answer
- D. An answer not supported by the lesson

15. According to the lesson, what is described in statement 15?

- A. an NFC Reader responsible for the reading the information
- B. A different answer about According to the lesson, what
- C. A related but incorrect answer
- D. An answer not supported by the lesson

16. According to the lesson, what is described in statement 16?

- A. inside the Driver's License Card, Android Application for
- B. the drivers for easy monitoring of his/her own account and a
- C. Website to increase the way of how may the driver monitor
- D. his/her account.

17. According to the lesson, what is described in statement 17?

- A. the drivers for easy monitoring of his/her own account and a
- B. A different answer about According to the lesson, what
- C. A related but incorrect answer
- D. An answer not supported by the lesson

18. According to the lesson, what is described in statement 18?

- A. False
- B. True
- C. A different answer about According to the lesson, what
- D. A related but incorrect answer

19. According to the lesson, what is described in statement 19?

- A. his/her account.
- B. A different answer about According to the lesson, what
- C. A related but incorrect answer
- D. An answer not supported by the lesson

20. According to the lesson, what is described in statement 20?

- A. The database of each application is
- B. A different answer about According to the lesson, what
- C. A related but incorrect answer
- D. An answer not supported by the lesson

21. According to the lesson, what is described in statement 21?

Answer: _____

22. According to the lesson, what is described in statement 22?

Answer: _____

23. According to the lesson, what is described in statement 23?

Answer: _____

24. According to the lesson, what is described in statement 24?

Answer: _____

25. According to the lesson, what is described in statement 25?

Answer: _____

26. According to the lesson, what is described in statement 26?

Answer: _____

27. According to the lesson, what is described in statement 27?

Answer: _____

28. According to the lesson, what is described in statement 28?

Answer: _____

29. According to the lesson, what is described in statement 29?

Answer: _____

30. According to the lesson, what is described in statement 30?

Answer: _____

31. According to the lesson, what is described in statement 31?

Answer: _____

32. According to the lesson, what is described in statement 32?

Answer: _____

33. According to the lesson, what is described in statement 33?

Answer: _____

34. According to the lesson, what is described in statement 34?

Answer: _____

35. According to the lesson, what is described in statement 35?

Answer: _____

36. According to the lesson, what is described in statement 36?

Answer: _____

37. According to the lesson, what is described in statement 37?

Answer: _____

38. According to the lesson, what is described in statement 38?

Answer: _____

39. According to the lesson, what is described in statement 39?

Answer: _____

40. According to the lesson, what is described in statement 40?

Answer: _____

41. According to the lesson, what is described in statement 41?

A. True B. False

42. According to the lesson, what is described in statement 42?

A. True B. False

43. According to the lesson, what is described in statement 43?

A. True B. False

44. According to the lesson, what is described in statement 44?

A. True B. False

45. According to the lesson, what is described in statement 45?

A. True B. False

46. According to the lesson, what is described in statement 46?

A. True B. False

47. According to the lesson, what is described in statement 47?

A. True B. False

48. According to the lesson, what is described in statement 48?

A. True B. False

49. According to the lesson, what is described in statement 49?

A. True B. False

50. According to the lesson, what is described in statement 50?

A. True B. False

51. According to the lesson, what is described in statement 51?

A. True B. False

52. According to the lesson, what is described in statement 52?

A. True B. False

53. According to the lesson, what is described in statement 53?

A. True B. False

54. According to the lesson, what is described in statement 54?

A. True B. False

55. According to the lesson, what is described in statement 55?

A. True B. False

56. According to the lesson, what is described in statement 56?

A. True B. False

57. According to the lesson, what is described in statement 57?

A. True B. False

58. According to the lesson, what is described in statement 58?

A. True B. False

59. According to the lesson, what is described in statement 59?

A. True B. False

60. According to the lesson, what is described in statement 60?

A. True B. False

61. According to the lesson, what is described in statement 61?

Answer: _____

62. According to the lesson, what is described in statement 62?

Answer: _____

63. According to the lesson, what is described in statement 63?

Answer: _____

64. According to the lesson, what is described in statement 64?

Answer: _____

65. According to the lesson, what is described in statement 65?

Answer: _____

66. According to the lesson, what is described in statement 66?

Answer: _____

67. According to the lesson, what is described in statement 67?

Answer: _____

68. According to the lesson, what is described in statement 68?

Answer: _____

69. According to the lesson, what is described in statement 69?

Answer: _____

70. According to the lesson, what is described in statement 70?

Answer: _____

71. What wireless technology is integrated into the smart driver's license and handheld device for scanning driver data and processing fine payments?

Answer: _____

72. What operating system environment is used on the handheld device according to the study's block diagram and system objectives?

Answer: _____

73. What central infrastructure integrates the Windows application, Android mobile application, and handheld device?

Answer: _____

74. What system development methodology was employed during development to balance process and data within a single model?

Answer: _____

75. What specific hardware module embedded in the handheld device determines the geographical location where a traffic violation occurred?

Answer: _____

76. What material covers the acrylic glass casing of the handheld prototype to ensure neat condition on dusty roads?

Answer: _____

77. According to 2011 NSCB statistics cited in the text, what was the average number of daily vehicular accidents in Metro Manila?

Answer: _____

78. According to Dante Lantin in 2012, what percentage of road crashes was caused by driver error?

Answer: _____

79. According to the MMDA, how many traffic violations are committed every day in the National Capital Region (NCR)?

Answer: _____

80. Which hardware component is used in the Administrator Module to program a unique ID onto a new driver's smart card?

Answer: _____

81. What percentage of gross domestic product (GDP) is lost daily due to traffic gridlock in Manila according to Rappler data?

Answer: _____

82. How long do peak hours gridlocks often last across Manila's major roads according to background figures?

Answer: _____

83. In 2011, what government agency reported an average of 211 vehicular accidents per day in Metro Manila?

Answer: _____

84. According to blogger Urgel Sarmiento, how much time and money did he spend retrieving his confiscated driver license from LTO?

Answer: _____

85. According to blogger Jackie Go, how long did she spend during her mandatory visit to the LTO?

Answer: _____

86. What development methodology was adopted by the researchers to balance process and data focus into one model?

Answer: _____

87. Which software module provides administrators with tools to add new drivers, renew licenses, and search driver lists?

Answer: _____

88. How does the handheld enforcer device interact with the smart driver license to retrieve personal information?

Answer: _____

89. What UI mechanism in the Android application allows drivers to expand and view detailed info

for an accumulated violation?

Answer: _____

90. What protective covering material is used over the acrylic glass casing of the handheld prototype?

Answer: _____

91. What is the primary function of the built-in GPS module in the enforcer's handheld device?

Answer: _____

92. How is an electronic payment receipt transmitted to the caught driver immediately following an apprehension?

Answer: _____

93. Which driver information field can be updated directly by the driver using the Android mobile application?

Answer: _____

94. How does a driver initiate account balance checking on the Windows loading application?

Answer: _____

95. What major convenience does virtual license confiscation offer to penalized drivers?

Answer: _____

96. What security objective was established for the NFC cards used as driver licenses?

Answer: _____

97. Why was carbon fiber wrapping selected for the exterior of the handheld device prototype?

Answer: _____

98. What occurs to a driver's account balance stored in the cloud after a violation fine is processed?

Answer: _____

99. Which institutional body provided partial research support for the project as noted in the acknowledgments?

Answer: _____

100. Which recommendation was specifically made by the authors to enhance future handheld hardware?

Answer: _____
